EDUCATION

Bachelor of Computer Science and Engineering, BS in Computer Science

Expected 2026

- CGPA: 8.28

SKILLS

Languages: Java, Python, HTML, CSS, JavaScript

Technologies: React.js, Node.js, MongoDB, MySQL

EXPERIENCE

Data Analyst Intern, Cognifyz Technologies

June 2024 – July 2024

- As a Data Analyst Intern, I worked on various projects utilizing Python for data manipulation, cleaning, and preprocessing large datasets. I performed various analyses to uncover trends and patterns and created visualizations to communicate insights effectively. My proficiency in Python enabled me to extract valuable information and drive informed decision-making, delivering meaningful results throughout my internship.

PROJECTS

E-commerce Platform | React.js, Node.js, MongoDB

- This e-commerce platform provides a seamless and scalable online shopping experience. Built with React.js for a responsive and user-friendly interface, it enables smooth product browsing, search, and filtering. It uses Node.js for efficient server-side processing, while MongoDB ensures flexible and reliable data management. This platform is designed for optimal performance and scalability, offering a professional solution for modern online stores. It is easy to navigate, ensuring a smooth and enjoyable shopping experience for users.

Weather App | React.js

- This weather application is built with React.js that allows users to search for weather details of any city. It fetches real-time weather data, displaying information such as temperature, humidity, and wind speed. The app also shows corresponding weather icons based on the weather conditions. Users can search for different cities using a search bar, and the app will update with the current weather data for the selected city.

CERTIFICATIONS

Meta Front-End Developer (Coursera)

Data Structures Algorithms in Java (Infosys)

Python for Data Science (NPTEL) | Elite

Introduction to Machine Learning (NPTEL) | Gold

ACHIEVEMENTS

Solved **900+** problems on Skillrack, demonstrating strong problem-solving and algorithmic skills.

Solved **240+** problems on Leetcode, showcasing expertise in data structures and algorithms.
